Abstract

A person is simultaneously in a material, etheric and spiritual environment. It is connected with the material environment by gravity. In the ethereal environment, he is able to levitate. In the spiritual environment, he is perfected to the likeness of the Creator. A person's thoughts have a spiritual essence. The inner speech of a person generates gravitational waves. Navigation between subjects is carried out by etheric waves. Short paper dedicated to new topic of research about communication by internal speech. The topic is offered to the international scientific community for the development of new technologies and obtaining new results.

Keywords: Internal speech, gravitational waves, ethereal auditory receiver.

Introduction

The human mind was functionally created by the providence of the Lord in the image and likeness of His Wisdom. The Wisdom of the Creator includes a picture of the creation and development of the Universe. The mental field of the mind of a perfect godlike man, gradually expanding in the knowledge of the cosmos, will be able to cover the universe in time and space [1]. The mind, concentrating on various entities of the surrounding world, interacts with them on the basis of wave information, exploring them. Exploring the world around us is an innate ability of every person.

All the information in the universe is contained in one place. This is an information field that is outside of time and space, that is, everywhere. It contains all the history, all the knowledge. It exists and connects all beings and all events taking place in the universe. This information field is at the highest frequency, so it is very difficult to connect to it from our spiritual level.

The mental field of the mind gives birth to thoughts that have spiritual essence, which initiates internal speech using etheric resonance technology with the emission of corresponding semantic gravitational waves. The gravitational waves of the inner speech of the mental field of the righteous mind of a spiritually bright person, directed to another spiritually bright person in his image, are perceived by his mental field of mind, according to which the light spirit initiates the corresponding semantic inner speech [2]. Fix the inner speech in your mind and think only about this subject, as if contemplating it. Semantic

information flows into your brain, in the form of clear insights and a new understanding that has come. Waves of energy will bring informational images. Our consciousness has a certain frequency. Consciousness can work at different frequencies depending on spiritual state of mind.

Natural communication by ethereal and gravitational waves:

Researchers and writers have recorded many cases of kinship, creative and spiritual rapprochement of people in different parts of the world when there were no modern means of communication. The natural means of communication were ethereal and gravitational waves. Ether waves brought together creative people working on the same information field of the Universe. Close relatives were brought together through a genealogical energy field. Spiritual rapprochement is carried out through the Spirit of the Creator. And he who unites with the Lord is one spirit with the Lord (1 Corinthians 6:17).

Communication between representatives of the Universe is carried out by living wave information. The living information of person are accumulated and stored in the form of holograms. The novelty is revealed by the coordination of holograms through the holographic scenario of the development of the Universe in time prescribed by the laws of the Creator. Coordination of holograms is carried out in the ethereal field depending on the spiritual state. Spiritual people activate ethereal energy, that covers the entire Universe and participates in all processes. The prayer of the Jerusalem Patriarch to God on Easter in the Cathedral of Christ the Savior activates the ether energy in the form of sparking ether (the descent of a non-burning fire).

Gravitational waves semantically naturally connect spiritually perfect people by internal speech communication. Communication by internal speech can be carried out at the level of gravitational waves of the speech range. The structural forms of the nano gravitational mass will make it possible to create schematic diagrams of transmitters and receivers of gravitational waves. Gravitational waves are the inner speech of the universe, signals of which propagate at an equivalent frequency of internal speech of a person. This will allow in interstellar space make spirit galactic communication based on gravitational waves passing the galaxy due to superluminal speed in an acceptable short time. Sincere prayer of the energetically inflamed soul in spirit to the Lord is instantly delivered by its gravitational wave to the keeper angel (heavenly servant of the Lord). Gravitational waves are created by precession of magnetic moments, like dynamic longitudinal waves in an ethereal medium^[3]. The propagation of a gravitational wave represents the longitudinal deformation of an ethereal field at superluminal velocity due to its super powered vortex energy. The ethereal field responds instantly to deformation.

To achieve the gravitational technological success of galactic communication and gain access to the Universe, humanity must move from consumer life to spiritual way of life. The spirit creates forms of interaction and movement depending on the state of the spirit of the person and society as a whole. The Light spirit improves the quality of the temporary etheric shell to the state of eternity with sensitivity capable of detecting weak gravitational waves. With the spiritual structure of society, perfect people, successfully using the possibilities of technology and nature, will be able to communicate by internal speech at distance on the basis of gravitational waves.

Good righteous thoughts give rise to inner speech, which in the mental ethereal field initiates appropriate gravitational directional waves for the target spiritual ethereal auditory receiver. The ethereal auditory receiver of gravitational waves of the speech range is the ethereal shell of the auditory organ. To perceive gravitational waves of internal speech, a person needs to achieve the appropriate sensitivity of the ethereal auditory receiver. Then a semantic dialogue of internal speech is established between talking people using gravitational waves. The sensitivity of the ethereal auditory receiver to the perception of gravitational waves of the speech range is maintained by a light spirit. The Holy Spirit of Jesus Christ supported the recognition of thoughts from gravitational waves initiated by the internal speech of others.

Technological support of natural communication:

Technological support of natural communication provides the necessary sensitivity of semantic perception by the neural systems of the brain of the receiver of gravitational waves of the internal speech of the transmitter.

Promising scientific research in the field of nano and neuro technologies will allow to develop nanoneurosensors with energy detector of semantic information, that increase the sensitivity of the ethereal auditory receivers for the perception of gravitational waves of internal speech of the mental field of the righteous mind of a spiritually bright person^[4-7]. Energy detector of semantic information reveals the possibility of activating internal speech by holographic and spectroscopic crypto algorithms to ensure the sensitivity of the corresponding brain neoformations and the susceptibility of the content of incoming speech gravitational waves ^[8].

Conclusion

The transition to the natural semantic communication of earthlings will solve a lot of environmental problems and will get rid of the clogging of the information noise of space. Natural communication with representatives of the Universe by ethereal and gravitational waves will allow them to fully participate in space exploration based on their experience.
